A New Paradigm  
for Global Medical Affairs

# How to Transition Your Career Between Pharma and MedTech

Click here to view the video recording

**Sean Lilienfeld, MBBCh,  
FCP (Neuro),  
MMed(Neuro), FAAN**

Vice President, Global Clinical  
& Medical Affairs  
Boston Scientific  
USA

**Kate Pietrovito**

Director, Medical Operations  
Varian Medical Systems  
USA

**Marc Rubinstein, MD**

Medical Director  
Instrumentation Laboratory  
USA

# Objectives

- Outline the core similarities and differences between Pharma and MedTech
- Assess the pros and cons of a potential move from Pharma into MedTech
- Describe the practical changes required to anticipate and prepare for such a career move

## Group Discussion (5 minutes)

- What are three topics you would like to learn about the difference between MedTech and Pharma

# Background MedTech Industry

*The days of simply manufacturing a device, and selling it to healthcare providers via distributors, have long vanished. Value is the new byword for success, prevention the preferred clinical outcome, and intelligence the new competitive advantage.<sup>1</sup>*

- Medtech is a global \$325 billion industry<sup>2</sup>
  - Historical 7% annual growth over past 5 years
  - Forecast 4% annual growth over next 5 years
  - Consolidation: top 10 players already command >50% of market
- Decisions previously made by clinicians are now shared with nonclinicians with differing objectives<sup>3</sup>
  - Cost effectiveness or basic cost information
  - Individual outcomes to population-level effectiveness

1. van den Heuvel R, Kapadia A, Stirling C, et al. Medical devices 2030: Making a power play to avoid the commodity trap. KPMG.

2. Johansson A and Axling B. The Future of Medtech – Applying the Power of Innovation.

3. Llewellyn C, Podpolny D, and Zerbi C. Capturing the new 'value' segment in medical devices. January 2015: McKinsey & Company

# What is Unique or Changing in MedTech

## 1. Medtech is a hugely diverse and changing space

- Broad spectrum: Band-Aids to Robots
- Data requirements and regulation are quickly evolving
- Technical aspects require product training and case support during procedures

## 2. Company size reflects resourcing

- Resourcing reflects revenue, leading to diverse in small organizations
- Business units are often separate leading to independent functions and a lack of best practice sharing

## 3. 60% of medical device use is “off-label”

- Medical Information is critical to appropriate dissemination of information critical to a physicians' understanding of the product

## 4. Publish or Perish

- Peer-reviewed publications have been shown to have the largest influence on physicians at 80%, compared to 15-30% for conferences, manufacturer representatives, colleagues and the internet

# Seven Reason Fueling Med Tech Growth

1. Increasing Governmental Regulations
2. Greater Need for Clinical Evidence
3. Increased Spending on R&D
4. Aging Population Wanting to Remain Active
5. Personalized Care via Wearables
6. Increased Use of Outside Contracting Services
7. MedTech and Pharma Collaborations

# Group Discussion

- Discussion key topics during the group discussion

# Pharma → MedTech | MedTech → Pharma

- Transferable Skills
  - What TA, diseases does it make more sense?
  - Internal vs External factors to consider
  - Challenges
  - Keys to making a successful move

# Pharma → MedTech | MedTech → Pharma

- Collaborative Partners
  - Regulatory: differences, timelines and pathways
  - R&D: how MedTech collaborates
  - Commercial: differences and similarities
  - Product Development: interactions, timelines

# Pharma → MedTech | MedTech → Pharma

- Customer Differences
  - Pharma: Medicine Physician
  - MedTech: Surgeon
  - Patient Centricity
  - KOL interaction

# Pharma → MedTech | MedTech → Pharma

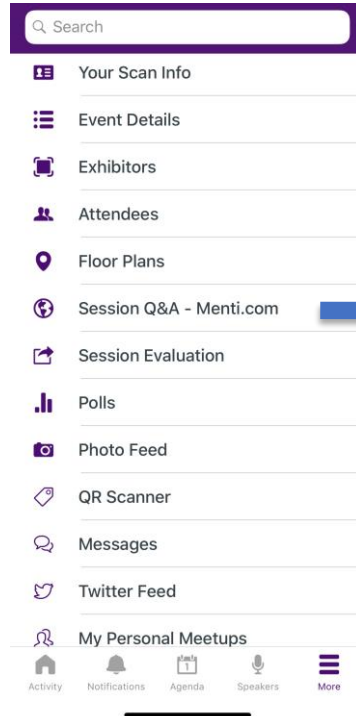

- Technical Skills
  - Key skills to success
  - Background important?
  - Sizes of teams and different responsibilities
  - Internal medical expert vs external KOL

# Conclusions

- More aspects are similar than dissimilar
- Majority of needed skillsets are exchangeable
- All about improving patient care

If you want to make the transition... do it!
